Supporting Teachers with Ochre Education Evidence-Based Primary English Resources

Ochre Education's English resources have been expertly designed to support teachers in delivering high-impact, evidence-based English lessons aligned with the Australian Curriculum, Victorian Curriculum, and NSW Curriculum. Every unit includes detailed curriculum planning materials and aligned comprehensive instructional materials including assessments. Resources are downloadable and fully editable, giving teachers the freedom to customise lessons to their students' needs. All materials can be freely accessed by creating a free account on www.ochre.org.au.

Built Around High-Quality Texts

At the heart of each unit is a rich and complex text that has been carefully selected to provide the opportunity for rich discussions, student reflections and models of great writing. The texts featured in the novel studies are written by a range of authors, both Australian and international, and collectively provide students with a range of voices.

Supporting Teachers with Ochre Education Maths Curriculum Resources

Ochre Education's Maths resources have been expertly designed to support teachers in delivering high-impact maths lessons aligned with the Australian Curriculum, Victorian Curriculum, and NSW Curriculum. Backed by evidence-based practices and informed by deep classroom experience, these adaptable resources are designed to support teachers to improve student outcomes and help close the disadvantage gap. All materials can be freely accessed by creating a free account on www.ochre.org.au.

Introducing Purpose-Built Maths Mini-Whiteboards

The use of mini-whiteboards is a foundational tool in Ochre explicit-instruction maths materials in both primary and secondary classrooms to check for understanding, support feedback and student engagement. Mini-whiteboards allow teachers to see all students' responses simultaneously, helping to ensure that every student is participating, has a voice and is academically accountable. This is particularly helpful during Ochre Daily Reviews, and in the guided practice or 'we do' elements of an explicit instruction lesson.

To further support the delivery of the Ochre Education Maths curriculum, we're excited to introduce new maths-specific mini whiteboards, designed to make it even easier to use Ochre materials with mini-whiteboards in primary and high school classrooms.

Primary-years student mini-whiteboards are pre-printed on one side with bespoke high-utility mathematical representations which are specifically designed for each year level. The second side is left blank for flexible student use.

- Foundation - ten frames and the numerals 0-9
- Year 1 - number lines and hundreds place value chart
- Year 2 - number lines and thousands place value chart
- Year 3 and 4 - number lines and unlabelled place value chart
- Year 5 and 6 - number lines and unlabelled place value chart

Secondary-years student mini-whiteboards include a pre-printed square grid on one side, with the second side left blank.
